

RECENT STUDY REVEALS

WHY A PRACTICE IS ONLY AS RESILIENT AS ITS WEAKEST VENDOR

Cyber Risk Is Now a Patient Care Risk

omega systems

MOST UNDERESTIMATED THREAT REPORTED

of healthcare practices report they've experienced an **operational disruption caused by a third-party vendor failure in the last 12 months.**

Healthcare organizations are increasingly dependent on a complex network of EMR providers, cloud platforms, billing vendors, cybersecurity tools, and technology partners. **When one link breaks, patient care, operations, and revenue are often impacted.**

CONFIDENCE GAP

There is an apparent false sense of confidence.

PERCEPTION

Are confident in the cybersecurity posture of their vendors

ALARMING REALITY

Not many continuously monitor their networks and digital supply chains

WHEN A CRITICAL SYSTEM FAILS

Operations, patient data, patient care and practice reputation suffers.

Disrupt billing, scheduling, and claims processing instantly.

Prevent access to patient histories and medication records, creating immediate patient safety concerns.

Damage practice reputation and reduce patient referrals.

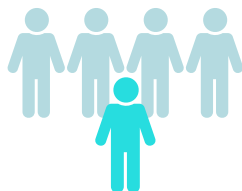

Force temporary or permanent practice closure.

WHAT HINDERS BREACH RECOVERY?

1 IN 5

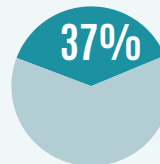

Healthcare practices are entirely dependent on a third party's recovery efforts to restore critical systems.

31%

...and **31% still operate with legacy infrastructure** – which may slow breach recovery further.

CARE OR CASUALTY?

Say **patient data protection** is one of the **most significant challenges** they face.

2026

61.5%

2025

52%

...and increasing concern: **61.5 % believe a fatal patient incident caused by a cyberattack is inevitable in the next 5 years.** Up nearly 10% from 2025.

**BUILD RESILIENCE
BEFORE DISASTER**

Learn how healthcare organizations are strengthening cybersecurity, improving recovery readiness, and reducing third-party risk with managed IT and security partnerships.
